Professional Summary

Full-Stack Developer with over seven years of experience, specializing in cross-platform mobile development with Flutter and React-native and server-side applications using Node.js. Highly skilled in enhancing analytical thinking and promoting collaboration within dynamic team settings. Proven track record in delivering robust, scalable applications and optimizing performance through innovative solutions.

Skills

React Native Developer

Redux, Redux Toolkit, MobX, Context API

CI/CD

Automating build, test, and deployment processes

Frontend Web Developer

React, HTML, CSS, JavaScript.

React Developer

State Management, React HOOKS, Context API, TailwindCSS.

Flutter Developer

Bloc, Provider, Getx Framework State Management.

Back-End Developer

Node JS , ASP.NET Core API, NestJs, PHP

Database

SQL Server, SQLite, MySQL, MongoDB, DynamoDB

Amazon Web Services

Lambda functions using node js, DynamoDB, API Gateway, and S3 Bucket service.

Real-Time Communication

Firebase (FCM, Realtime Database), SignalR (chat, live notification).

Version Control System

Team Foundation Server, Git on Github

Work Experience

React Native Developer

2024 Oct – Present

Zane Technology

- Built reusable, modular UI components using React native, ensuring performance and consistency across platforms

- Integrated RESTful APIs to fetch and post data from a cloud-based backend (Firebase/Node.js/Express).
- Using Martix to build platform for chatting and video calls.

Full Stack Developer

2022 Jun – 2024 Jul

WORLD ADVANCE TECHNOLOGY

Dubai, UAE

- Created and managed APIs using Node.js and AWS Lambda functions, enhancing backend functionality and scalability.
- Developed and maintained cross-platform mobile applications using **Flutter** framework.
- Troubleshoot and debugged issues to ensure optimal application performance.

Full Stack Mobile Developer

2021 Aug – 2022 Aug

Oasis Computer Systems

Saudi Arabia

- Led a team of four developers to deliver three high-quality applications within the deadline, ensuring adherence to project requirements and performance standards.
- Developed an Insurance Broker application by Flutter, and integrated the application with the Backend.
- Developed a comprehensive HR management panel using Flutter for the frontend and .NET Core for the backend API.

Mobile Application Developer

2020 Mar – 2021 Mar

MAQSOD Company

- Developed an online Android gym application using native Android technology (Java) for the frontend and PHP for the backend, ensuring a smooth user experience and efficient data management.
- Designed and integrated a medical delivery application with backend services, optimizing the delivery workflow and enhancing overall system performance and reliability.

Mobile Application Developer

2019 Jun – 2020 Jul

AL-MOTAKAMELA Company

- Developed an E-Payment mobile application using native technologies (Java).
- Modified existing payment applications to enhance and improve overall performance.
- Resolved system tests and validation problems to provide normal program functioning and behavior.

Projects

MoneyMov – Wallet & Expense Tracking App

Flutter | Clean Architecture | BLoC | Firebase | App Store + Google Play

- Developed full-stack mobile wallet app for tracking expenses and notes

- Implemented authentication, multi-account, transactions, and real-time updates
- Used clean architecture with layered modules and BLoC for state management
- **Published on:** Google Play [🔗](#)

Humam

Flutter | MVC | GetX | Firebase | App Store + Google Play

- Built a smart digital intermediary platform that connects users with certified maintenance service providers (plumbers, electricians, AC technicians, cleaners).
- Implemented end-to-end service request flow: service selection → technician matching → order tracking → completion & review.
- Integrated real-time updates, transparent rating system, and multi-payment support.
- Ensured seamless UX with professional UI, fast response time, and reliable performance.
- Contributed to a scalable architecture supporting thousands of users with live tracking and technician dispatching.
- **Published on:** Google Play [🔗](#) y(Client App) [🔗](#) Apple Store(Client App) [🔗](#) Google App(Worker App) [🔗](#)

Education

Degree of Bachelor in Computer System & Network
Sudan University of Science and Technology

2014 – 2018
